## Bank of Bahrain and Kuwait B.S.C. (BBK B.S.C.)

# **Basel III Regulatory Capital Disclosures**

(For the nine month period ended 30 September 2021)

In November 2018, the Central Bank of Bahrain (CBB) issued its final Leverage regulation, with an effective date of 30 June 2019. The leverage ratio is a simple ratio that serves as a supplementary measure to the risk-based capital requirements. It aims to constrain the build-up of leverage in banking sector, reinforce the risk-based requirements with a simple non-risk based "backstop" measure, and serve as a broad measure of both the on and off-balance sheet sources of bank leverage.

The leverage ratio is measured as Tier 1 Capital divided by Total Exposures. Total Exposures consist of on-balance sheet, off-balance sheet, derivatives and securities financing transactions exposures. As per CBB regulations, Bahraini banks must meet a 3% leverage ratio minimum requirement at all times, except for Domestic Systemically Important Banks (DSIBs), where the minimum ratio is higher at 3.75%. Accordingly, as a DSIB bank, the minimum ratio applicable for BBK is 3.75%. As of 30 September 2021, the leverage ratio for BBK stood at a healthy position of 13.50%.
